Born at Sunrise Basic Attributes

Base is 10.5 cm square and 6.5 high at the peak. The matrix is epoxy holding Quartz Crystal, Copper spiral wire and plate, Birch Tree bark, magnetic Volcanic Sand, water from St. Michael's mound on the St. Michael's ley line in South England, gold colored Copper foil and magnetic Volcanic Sand and rainbow Flower of Life on the front.

This Pyramid was taken out of the form at sunrise and is called; "Born At Sunrise." A beautiful, handmade pyramid based on the energetic principals of Orgonite. This Flower of Life Pyramid is designed with the alternating layers of carefully selected materials to draw in low frequency energies and convert them into higher frequency, life supporting energies. As the acrylic Matrix was hardening, it was tuned to 528 Hz Solfaggic frequency, the frequency love and the musical note of miracles and transformation. There is also a pizeo-electric effect strengthening the Quartz Crystal at the top which acts as a positive energy sending antenna. Water is known for storing energy and I collected the water inside this pyramid from St. Michael's Mound in South England.

Symbols & Cap Stone

The front symbol is the Flower of Life and the cap stone within the epoxy is a polished Quartz crystal. The Flower of Life helps bring holistic order into one`s

life and the Quartz crystal acts as an antenna to broadcast positive energy into the room that it is in.

Properties of the materials

Quartz Crystal- Quartz is a stone of clarity which clears away negative energy, clarifies thought processes and emotions. At the top of the pyramid, it also acts as an antenna.

Copper- Excellent electrical conductor and energy amplifier. Said to keep dark energies away.

Birch Tree Bark – brings flexibility and sweetness into one's environment

Magnetic, Volcanic Sand – The sand from Santorini, Greece has a strong magnetic quality and helps draw in energy. This natural sand has the ability to store and radiate large amounts of positive energy.

Water from Sacred Places – The water inside the pyramid acts as an energetic battery storing positive energy to be transmitted into the area the pyramid is in. I personally gathered this water from the area of St. Michael's Mound in South England.
