

Energie Converters, 2000 Series

6.5 -7 cm diameter base, 3.5 cm high,

By: Michael Goddard, März 2017

The 2000 Series are approximately 3.5 cm high and 6.5 to 7cm wide at the base and 2cm square top.

Each 2000 Series Energie Converter contains high energy organic and metallic alternating layers. The Energie Converter is so named as it is used to convert the energy coming from WiFis from low energy to a higher, life supporting energy.

The layers in the 2000 Series are as follows;

1. 4 Herkimer Diamonds (faceted Quartz), one in each corner of the top.
2. Then a Metatron's Cube or Eye of Ra power symbol with a transparent rainbow backing.
3. Beneath is a copper, (gold colored) foil. The next layer is black volcanic, magnetic sand from La Palma, Spain.
4. The next layer is 4.5cm square copper metal plate with rounded corners.
5. The next layer contains quartz chips in the corner and black volcanic, magnetic sand from La Palma in the rest of the layer.
6. Next layer contains cut copper plate pieces.
7. A layer of black volcanic, magnetic sand from La Palma.

As each is a hand-made work of art, the sides maybe a few millimeters out of flush and height and base measurements may vary by a few millimeters

Symbols

The top symbol is the Eye of Ra and Metatron`s Cube. The Energie Converters are designed to draw in low frequency energy (like WiFis) and convert the energy to a higher, life supporting frequency. The symbols on the top help program the energy coming out into your living area.

Eye of Ra Symbol - Increases intuition and “sees” the truth in situations.

Metatron`s Cube Symbol- Opens our consciousness to higher levels of existence and brings inner peace.

Properties of the materials

Herkimer Diamonds – These faceted Quartz crystals are from Herkimer county N.Y. and are “attunement stones” that help one to Tune-in to their energy and the energy of others.

Copper- Excellent electrical conductor and energy amplifier. Said to keep dark energies away.

Volcanic, Magnetic Sand- The sand from La Plama, Spain has a strong magnetic quality and helps draw in energy. This natural sand has the ability to store and radiate large amounts of positive energy.
